

## THE 100 SERIES

Today's musician has to be able to reproduce, on stage, a wide-ranging variety of sounds; much wider than many traditional amplifiers can offer.

Meeting this requirement was the main criterion for our engineers during the extensive research and development programme that led to the introduction of the 100 series.

That they have achieved this without sacrificing the quality of build required for life on the road in the 80s and at a price that is highly affordable, is a tribute to their skills in the application of modern technology.

*A new era for  
musical instrument  
amplifiers.*

The resulting units are both robust and compact and will go easily into the boot of most cars.

But don't let their small size fool you! The same potent 100 watt power amplifier is used in all the 100 series variations and is capable of producing extremely high quality sound at very high levels, higher in fact than many amplifiers claiming much greater power ratings!

The classic styling and quality of HH shines through and perfectly complements the dazzling array of features to be found in this star range.

We are confident that whichever instrument and style of music you play there is a model in our range to suit you.
