

PRO-150 II

200 Watt full range speaker system

Designed around the stunning 1500E bass driver and HF200 Bullet Radiator, the PRO-150 II shatters previous size/price/performance criteria. It will perform admirably well in a wide variety of applications including use as a club P.A. speaker, and superior disco speaker. The sound is full, crisp, and natural with surprising punch and dynamic range, putting out big sound from a moderately sized roadable cabinet.

PRO-200 II

400 Watt column speaker system

The HH PRO-200 II is a column speaker system using two 1200E drivers and the HF200 Bullet Radiator to deliver a controlled horizontal beam of sound at extremely high sound pressure levels without break-up. This unit is a natural for main house vocal sound reinforcement and operates well as a side-fill monitor—the sound is clear and uncoloured without distortion. High overall efficiency, plus a staggering 400 Watt power rating gives this unit a remarkable dynamic range, with a smooth full sound.
