

5 : Loudspeaker Systems

Designed from the Inside – Out

The H/H PRO Series loudspeakers reach far superior standards of sound performance than ordinary systems. Containing the superb magnesium chassis, 1200 and 1500 Series loudspeakers, the HF 200 Bullet Radiator, and the CD 400 Pressure Driver, purpose-developed by

H/H Acoustics - these new systems are years ahead. External design is equally impressive . . . new cabinet corner moulding, extruded high density polyurethane grills, and 'crocodile' grained vinyl covering, results in a stylish individual appearance to impress your audiences.

PRO-100

Highly Efficient Compact Speaker

The most compact of the range - the PRO 100 - packs a lot of punch from a 2 cubic ft. (56 litres) enclosure.

The complete sound spectrum is handled by the H/H 1200E 12" driver and the HF 200 Bullet Radiator. System impedance is a nominal 8 ohms maintained throughout the crossover region by a carefully designed steep-slope crossover network. High efficiency and wide frequency response are features which make the PRO-100 exceptionally versatile in use . . . from small control rooms, to medium sized halls - the PRO-100 will deliver.
