

PRO-150

Full Range Sound

Incorporating a 1500E 15" H/H Acoustics loudspeaker in a 4½ cubic ft. (127 litres) enclosure gives the PRO-150 extremely good bass extension and the ability to handle large amounts of amplifier power without distortion.

The response of the low frequency driver extends upwards to the crossover point where the HF 200 Bullet Radiator takes over to produce the high frequencies essential for vocal clarity and reproduction of biting instrument harmonies.

The high efficiency, wide dynamic range and excellent transient response of the PRO-150 means great performances every time.

Rated Power:	150 Watts R.M.S.
Nominal Impedance:	8 ohms
Dimensions:	28" × 20" × 16" (710mm × 518mm × 410mm)
Weight:	66 lbs. (30kg)

Supplied complete with connecting lead, instructions and transport cover.
