

Unit P.A.

Strong Carrying Power-defined Sound

Unit Radial Horn

1500E 15" Unit Bass

Unique Modular Concept

The Unit P.A. is a high power modular speaker system especially designed for portability and flexibility. Very high power handling and high efficiency combine in the Unit P.A. to produce a system that will project the sound of your music, from kick drum to hi-hat, with incredible power and attack. From low, full bass through to sizzling highs, the wide dispersion characteristics of the Unit P.A. ensure maximum sound coverage and penetration. Large venues are no longer a problem. The Unit P.A. concept enables a speaker system to be built-up to suit the most demanding concert hall.

Unit Bass

The new H/H Unit Bass enclosure houses a powerful 1500E 15" driver designed to handle bass and lower midrange frequencies at power levels up to 150 Watts R.M.S. Dual reflex ports increase the low frequency efficiency of the Unit Bass and extend response downwards, so that really low notes are felt rather than heard. Two strap handles make the Unit Bass easily portable.

Rated power: 150 Watts R.M.S.
Nominal Impedance: 8 ohms
Dimensions: 28" x 20" x 16" (710mm x 518mm x 410mm)
Weight: 64 lbs. (29kg)

Unit Radial

The H/H high frequency radial horn is a new, wide dispersion design specially moulded in high density structural polyurethane. An acoustically 'dead' material, polyurethane adds no colouration to the sound. Tap an old-fashioned cast aluminium horn, and it rings at its resonant frequency. Tap the H/H polyurethane horn and all you hear is a dull thud. A high power crossover network is incorporated to protect the compression driver, a CD 400 made by H/H Acoustics, from harmful frequencies below 2kHz. A rotary attenuator allows the output level of the CD 400 to be adjusted to suit particular applications.

Rated Power: 50 Watts R.M.S.
Nominal Impedance: 8 ohms
Dimensions: 28" x 9" x 19½" (710mm x 229mm x 500mm)
Weight: 33 lbs. (15kg)

Enclosures

Unit Bass and Unit Radial enclosures are solidly built from high density ¾" (18mm) Tabopan finish in black, grained vinyl. H/H original corner mouldings protect against transit damage and assist P.A. stacking.

Supplied complete with connecting lead, instructions and transport cover.
